

# Add us in PointClickCare

Peerlytics Infection Management & ABX Stewardship is a web based software service allowing you to access the tool anywhere. To make this access even easier for Point Click Care (PCC) users, follow these directions to add an external link to your PCC platform.

1. Contact your Point Click Care contact and request your Peerlytics URL be added to the External Link portal in your PCC platform
2. *Once Peerlytics external link is added...*
3. You will have easy one click access to Peerlytics software services from PCC

Questions, technical assistance with adding external links should be brought to your Point Click Care Contact.

The screenshot shows the PointClickCare web application interface. At the top, there is a navigation bar with 'PointClickCare' on the left and a search bar on the right. Below the navigation bar, there are three main sections: 'Dashboards', 'Modules', and 'External Links'. The 'External Links' section is circled in black and contains the following options: 'View all links', 'Other', and 'Help'. Below the navigation bar, there is a large red banner with white text that reads: 'Please be advised that we will be performing a software update that will require up to 2 hours of outage during the maintenance time noted below.' This is followed by a list of maintenance times for various time zones: Eastern time, Central time, Mountain time, Pacific time, and Alaska time. At the bottom of the screenshot, there is a yellow banner with the text: 'Attention Integrated Lab Results Users' and a date '10/23/2020'. Below this, there is a small text block that reads: 'It has been brought to our attention that facilities are using the same processes/vendors for staff COVID-19 testing and resident testing, resulting in staff test results being returned through lab integrations. This could create visibility of employee PHI inside PointClickCare. Please work with your lab vendor to ensure that your staff testing process does not display results through PointClickCare.'
