Competency Assessment

Peerlytics Infection Management & ABX Stewardship software can provide real time infection management through spreading the workload across the continuum of care. Use this tool to assess competency with your care providers based on their role level within the software.

Nurse Role Level:

❏ Access the website and sign in

❏ Access training videos within the website

❏ Complete an SBAR for a resident with symptoms of infection
  ❏ Identify what information you will need to complete an SBAR entry
    ❏ Name, DOB, MR number...where to find this information

❏ Copy and paste SBAR information into EMR

❏ Print | send | communicate the SBAR information to the provider

❏ Document a newly prescribed antibiotic into Peerlytics without initiating an SBAR
  ❏ Identify what information you will need to enter antibiotic start

❏ Verbalize the process for infection surveillance and their role in the process

❏ Add a Watch & Wait
  ❏ Initiate new Watch/Wait
  ❏ Complete Watch/Wait
  ❏ Convert W/W to SBAR

❏ Add new admission/ new patient

❏ Complete a 72 hour timeout (antimicrobial timeout)

❏ Enter lab information (sensitivity report)

❏ Resolve an infection (complete an outcome)

❏ Edit/Delete infection information
