

Make QAPI meaningful.

Peerlytics Infection Management & ABX Stewardship is a web based software service used to maximize your Infection Prevention & Control Program. Through various reports, quality improvement projects and QAPI meetings can bring meaningful impacts to your care community.

Beneficial reports to explore:

1. **Facility map** this visual representation can paint a powerful picture to infection trends in your care community
2. **Infection Rate report** shows trends and cross-comparison of data can be helpful to guide education efforts.
3. **Bacteria in facility | Antibiogram** shows microorganism trends and can provide context to leadership to achieve antibiotic stewardship within your care community.
4. **Criteria Met report** helps show what providers may be prescribing medication when it did not meet criteria, learning and establishing an improvement plan can help reduce inappropriate antibiotics.

Other reports that can help with trend analysis include:

- Antibiotic per diagnosis
- Antimicrobial use per month
- Total Antibiotic count
- Days of Therapy
- Infection count

Pro Tip: clicking all necessary report boxes will provide a well-organized pdf for printing and sharing.

What is QAPI: Quality Assurance and Performance Improvement (QAPI) is a data driven and proactive approach to quality improvement.
